NORTHROP GRUMMAN

BOEING

# Elysium

Global Product Data Interoperability Summit | 2014

- **Founded : 1984**
- **Employees : 95 (56 in R&D)**
- **Core Competencies:**
  - Data Translation
  - Geometry Healing
  - Data Quality Management
  - Simplification
- **Off-the-Shelf, OEM, & Migration Services**

# Locations

Global Product Data Interoperability Summit | 2014

**North America**  
Southfield, MI  
Huntington Beach, CA

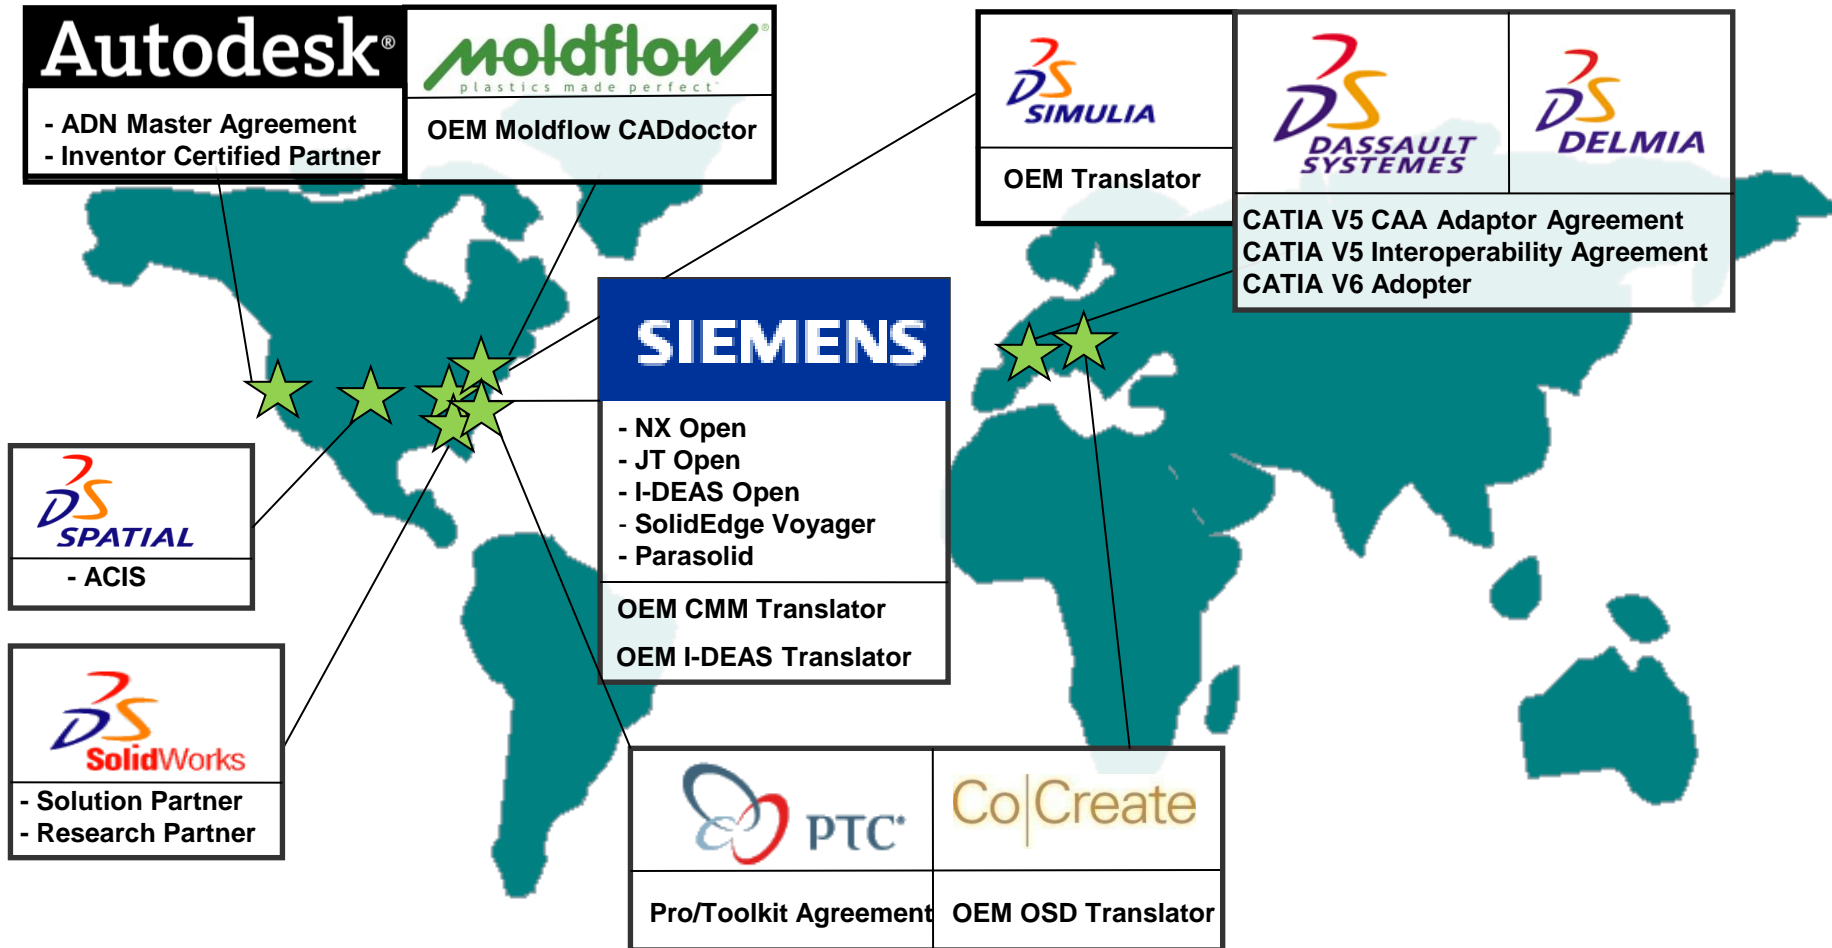

**Europe**  
Paris, France

**Global HQ / Asia**  
Hamamatsu, Japan

# Partnerships

Global Product Data Interoperability Summit | 2014

Elysium keeps expert knowledge of all major CAD systems via official partnerships with all major vendors.

4

# Goals

Global Product Data Interoperability Summit | 2014

- **Preserve the investment made in the legacy data**
- **Promote current CAD lifecycle**
- **Maximize skillset of already trained resources**
- **Lower the cost of conversion to a new CAD system**
- **Migrate data accurately**
- **Migrate data that is usable for the desired scenarios**

# Process Steps

Global Product Data Interoperability Summit | 2014

- **Identify** the data to be migrated and lock it in the source system to prevent modification during the migration process
- **Migrate** legacy data sets to new CAD data sets
- **Approve** new data sets for use after completing repair. The migrated revision should be locked as “read-only” and preserved as a record of the migration process. A new revision will be created for any future change.

# Identity - Customer Audit

Global Product Data Interoperability Summit | 2014

- **Customer background**
  - **Company overview**
  - **CAD usage information**
- **Data management analysis**
  - **Audit your CAD data and perform statistical analysis to predict migration results**
- **Part, assembly, and drawing analysis**
  - **Estimate pass rates**
- **Conclusions**
  - **Basis for discussion to develop business and technical migration plan**
  - **Highlight any special situations**
  - **On-site for typically 2-3 days**

# Identify - Understanding Migration Advantage

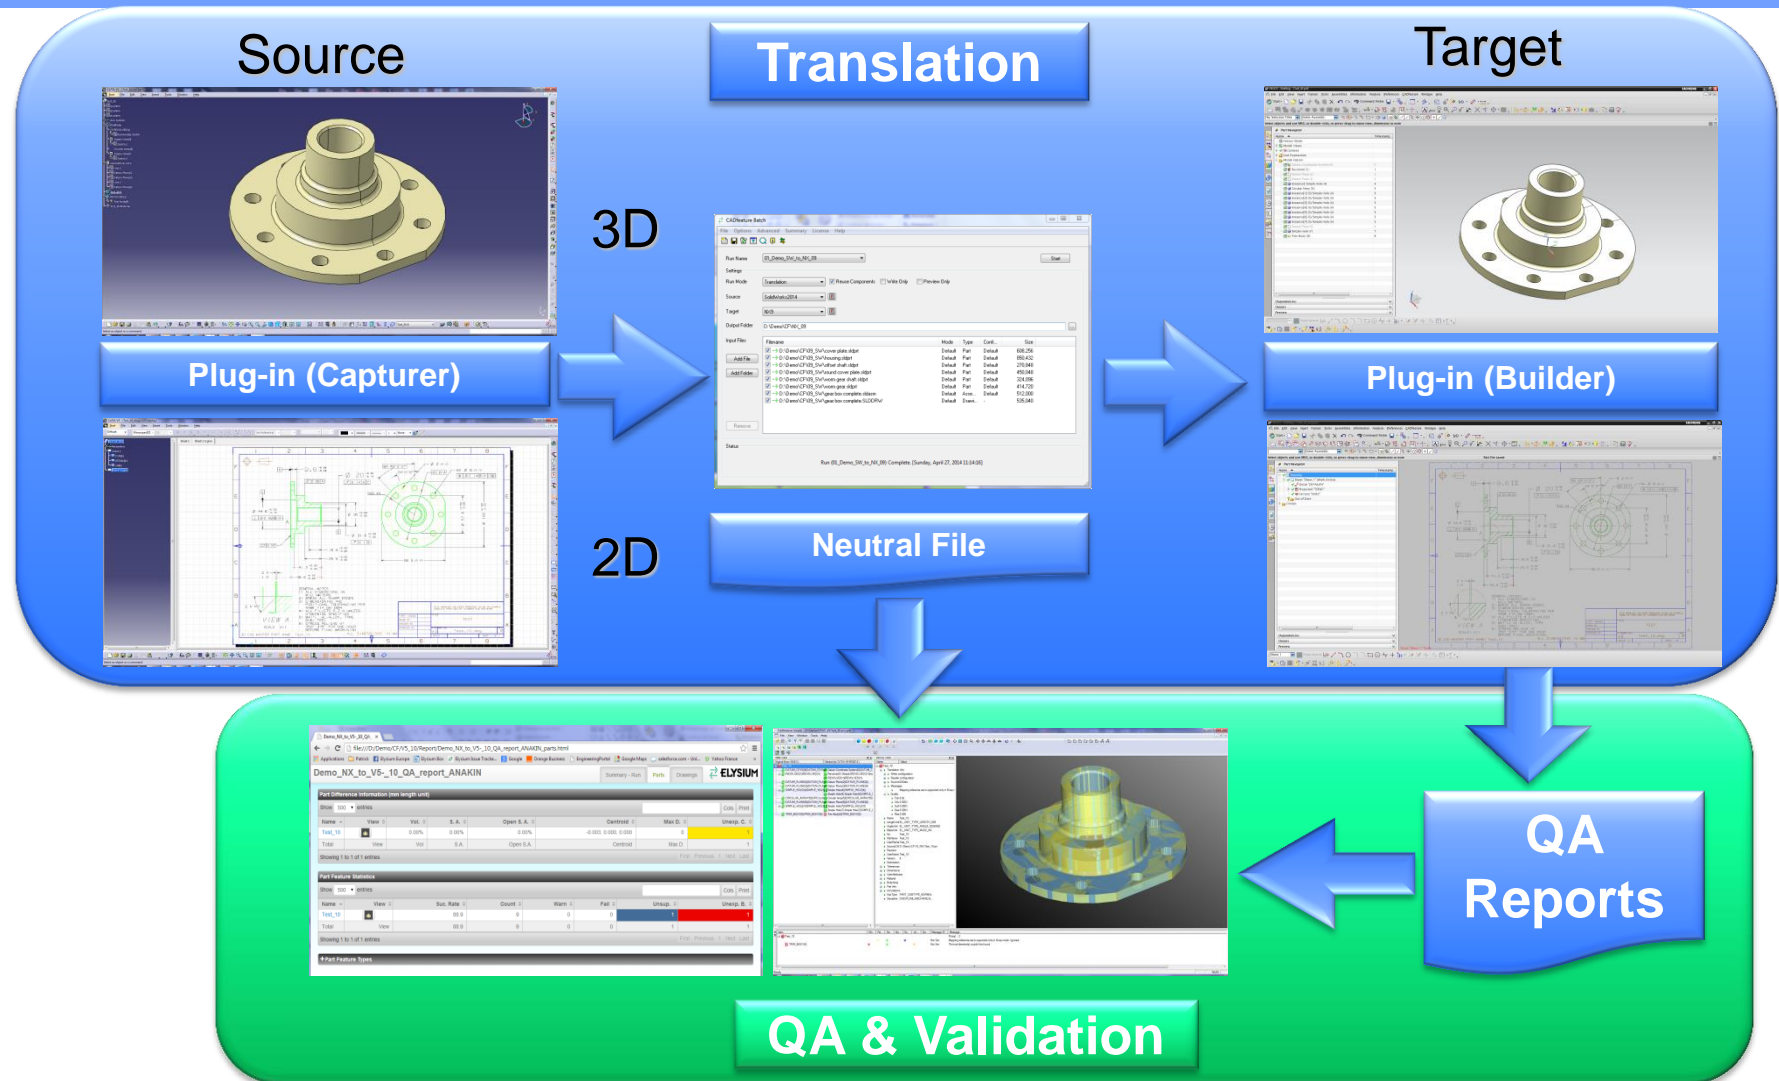

Global Product Data Interoperability Summit | 2014

Classification	Grouping	Migration Target	Migration Time	QA	Post Migration
Legacy Part	50-70%	STEP, JT	N/A	NO	Reference Only. Migrate Later
Regular Part	50-90%	B-rep	Fast	YES	Use direct editing. Option to migrate to features later
Active Part	5-20%	Features	~2.5*Part Replay	YES	Part Repair

# CADfeature

Global Product Data Interoperability Summit | 2014

# Identity using CADfeature

Global Product Data Interoperability Summit | 2014

- **Batch Processing with or without UI**
- **Audit Tool**
- **Data mining and success rate forecast**

# Migrate using CADfeature

Global Product Data Interoperability Summit | 2014

- **Part, assembly and drawing**
- **Component reuse**
- **Standard part mapping**
- **Attribute mapping**
- **3D PMI**
- **Brep, Feature or both**
- **Associative or static drawing**

# The Technical Challenge

Global Product Data Interoperability Summit | 2014

# Approve using CADfeature

Global Product Data Interoperability Summit | 2014

- **Part fidelity checks**
  - Volume, surface area, centroid, and point cloud
  - Exhaustive geometry checks with CADdoctor GVT
  - Curve length
- **Assembly fidelity checks**
  - Total Volume, surface area, centroid
  - Instance location checks
- **Drawing**
  - Sheet counts and sizes
  - View counts, locations, borders and geometry score
- **2D & 3D PMI**

# QA

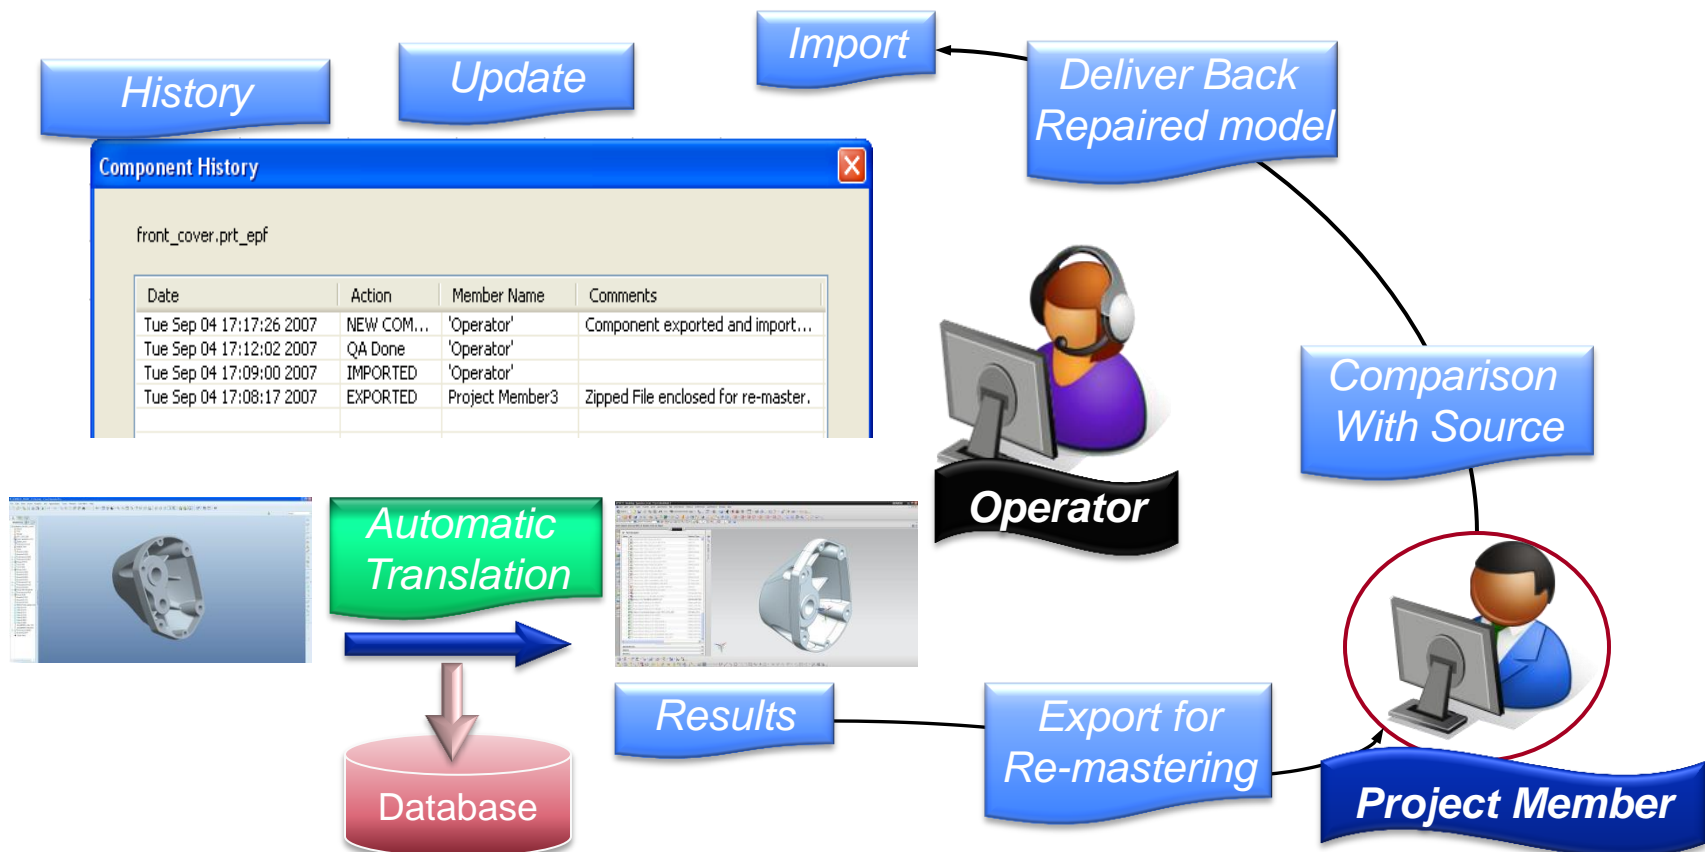

Global Product Data Interoperability Summit | 2014

- **Raw XML QA report**
- **HTML with WebGL QA report**
- **CADfeature Viewer, CADdoctor GVT**
- **Dynamic QA (Display QA during rework)**

# Re-Master Process Management

Global Product Data Interoperability Summit | 2014

- Repair of translated data while preserving the associative links

# Technology Demonstration

Global Product Data Interoperability Summit | 2014

- **Translation**
- **QA Report**
- **Re-master tools**
