Agenda

Global Product Data Interoperability Summit | 2018

The goal of this panel is to have an open and honest discussion about real world successes and challenges to speed code into production while deploying a DevOps framework.

We will also address corporate compliance in that environment.

The challenge of adhering to Compliance, whether from company requirements or government requirements is the responsibility of everyone in the company. Failing to have the right controls and culture in place could mean paying millions in fines and losing contacts.

We also need to develop a practice of adhering to DevOps principles.

In this panel, we will attempt to address these at a high level.

PDST-V Track Leaders

Global Product Data Interoperability Summit | 2018

- **Tom Dressler: Northrop Grumman**
 - Some self-serving words
- **Ryan Tracy: Boeing**
 - Some self-serving words

The Panel

Global Product Data Interoperability Summit | 2018

- **Kenny Swope – Boeing**
- **Chris Orłowski, PH. D: Systems Engineering – Northrup Grumman**
- **David Votaw – Northrup Grumman**
