GPDIS 2020 PARTNERS

Welcome to the 2020 GPDIS Virtual Sessions!

Global Product Data Interoperability Summit | 2020

History and Focus of GPDIS

- **Global Product Data Interoperability Summit (GPDIS) was formed in 2009. It was the consolidation of two conferences (Data Exchange and SOA Deep Dives) addressing integration technologies along with the non-proprietary exchange of data**
- **GPDIS functions as a communications hub for industry principals to foster knowledge through the exchange of ideas, solutions and methods.**

2020 Theme: The Great Race of Digital Transformation

How is your model based enterprise today?

- **Together we will explore digital transformation and what it will take us to FULLY achieve it. Using the Great Race as a metaphor, we will explore the building blocks of digital transformation and how interoperability will enable the digital transformation journey for industry.**

Creating a QIF file

Global Product Data Interoperability Summit | 2020

How QIF works in the code: features and MBD

Global Product Data Interoperability Summit | 2020

The QIF Feature

- Geometry controlled by the Profile Tolerance
- Contains a reference to all the CAD surfaces it references

```
<GenericFeatureNominal id="3178">
  <Name>Nominal 3178</Name>
  <FeatureDefinitionId>2000</FeatureDefinitionId>
