

# Migrations Support Digital Transformation

Presenter: Altair Kaminski

# Presenters Bio

Global Product Data Interoperability Summit | 2022

**Altair Kaminski**

**Northrop Grumman**

**Manager - PLM & Digital Strategy**

**12 years of PLM experience**

# Northrop Grumman Overview

Global Product Data Interoperability Summit | 2022

**Northrop Grumman solves the toughest problems in space, aeronautics, defense and cyberspace to meet the ever evolving needs of our customers worldwide. Our 90,000 employees are Defining Possible every day using science, technology and engineering to create and deliver advanced systems, products and services.**

**Aeronautics Systems**

**Defense Systems**

**Mission Systems**

**Space Systems**

# Propulsion System Division

Global Product Data Interoperability Summit | 2022

**World's leading supplier of solid rocket motors for civil, commercial and defense customers**

**Six decades of unmatched experience in designing and manufacturing:**

- **Strategic grade solid rocket motors**
- **Solid propulsion for space applications**
- **Human rated solid rocket boosters**
- **Specialty products using energetic materials**

**Modern, automated facilities and a world-class safety record**

**Located in Magna and Corinne, Utah**

# Propulsion System Division Programs

Global Product Data Interoperability Summit | 2022

**Space Launch System and Orion Launch Abort Motor**

**Minuteman III and Sentinel  
(Ground Based Strategic Defense)**

**CASTOR® Motors for Antares  
launch vehicles**

**Orion Motors for Ground-  
Based Midcourse Defense**

**GEM motors for Delta, Atlas and  
Vulcan launch vehicles**

**Trident II (D5)**

# Digital Transformation

Global Product Data Interoperability Summit | 2022

Digital Transformation  
is how PEOPLE  
generate, access and  
consume DATA while  
using TOOLS to follow  
their PROCESSES

# Digital Transformation is a Journey

Global Product Data Interoperability Summit | 2022

**“... digital transformation is not a single thing, but a multi-faceted journey with differing goals depending on your industry and digital maturity.”**

(Furr, Shipilov, Rouillard & Hemon-Laurens, 2022)

## Culture & People

Focus on  
employees as  
central to Digital  
Transformation

## Programs & Development

Ensure access to  
the right tools to  
support Enterprise  
Transformation

## Business & Operations

Drive efficiencies  
into business and  
operations

## Technology Enablers

Integrate digital  
technologies at  
every stage of the  
product lifecycle

# Migration & Digital Transformation

Global Product Data Interoperability Summit | 2022

The butterfly is often used as the symbol of a transformation,  
from a caterpillar to a beautiful butterfly

But consider that many species of butterfly also migrate

These two processes are often intertwined

# Migration & Digital Transformation

Global Product Data Interoperability Summit | 2022

**Much like  
butterflies  
migrate to their  
food...**

**People converge  
on new processes  
if they include  
familiar data**

## Data Connectivity throughout the lifecycle of a product

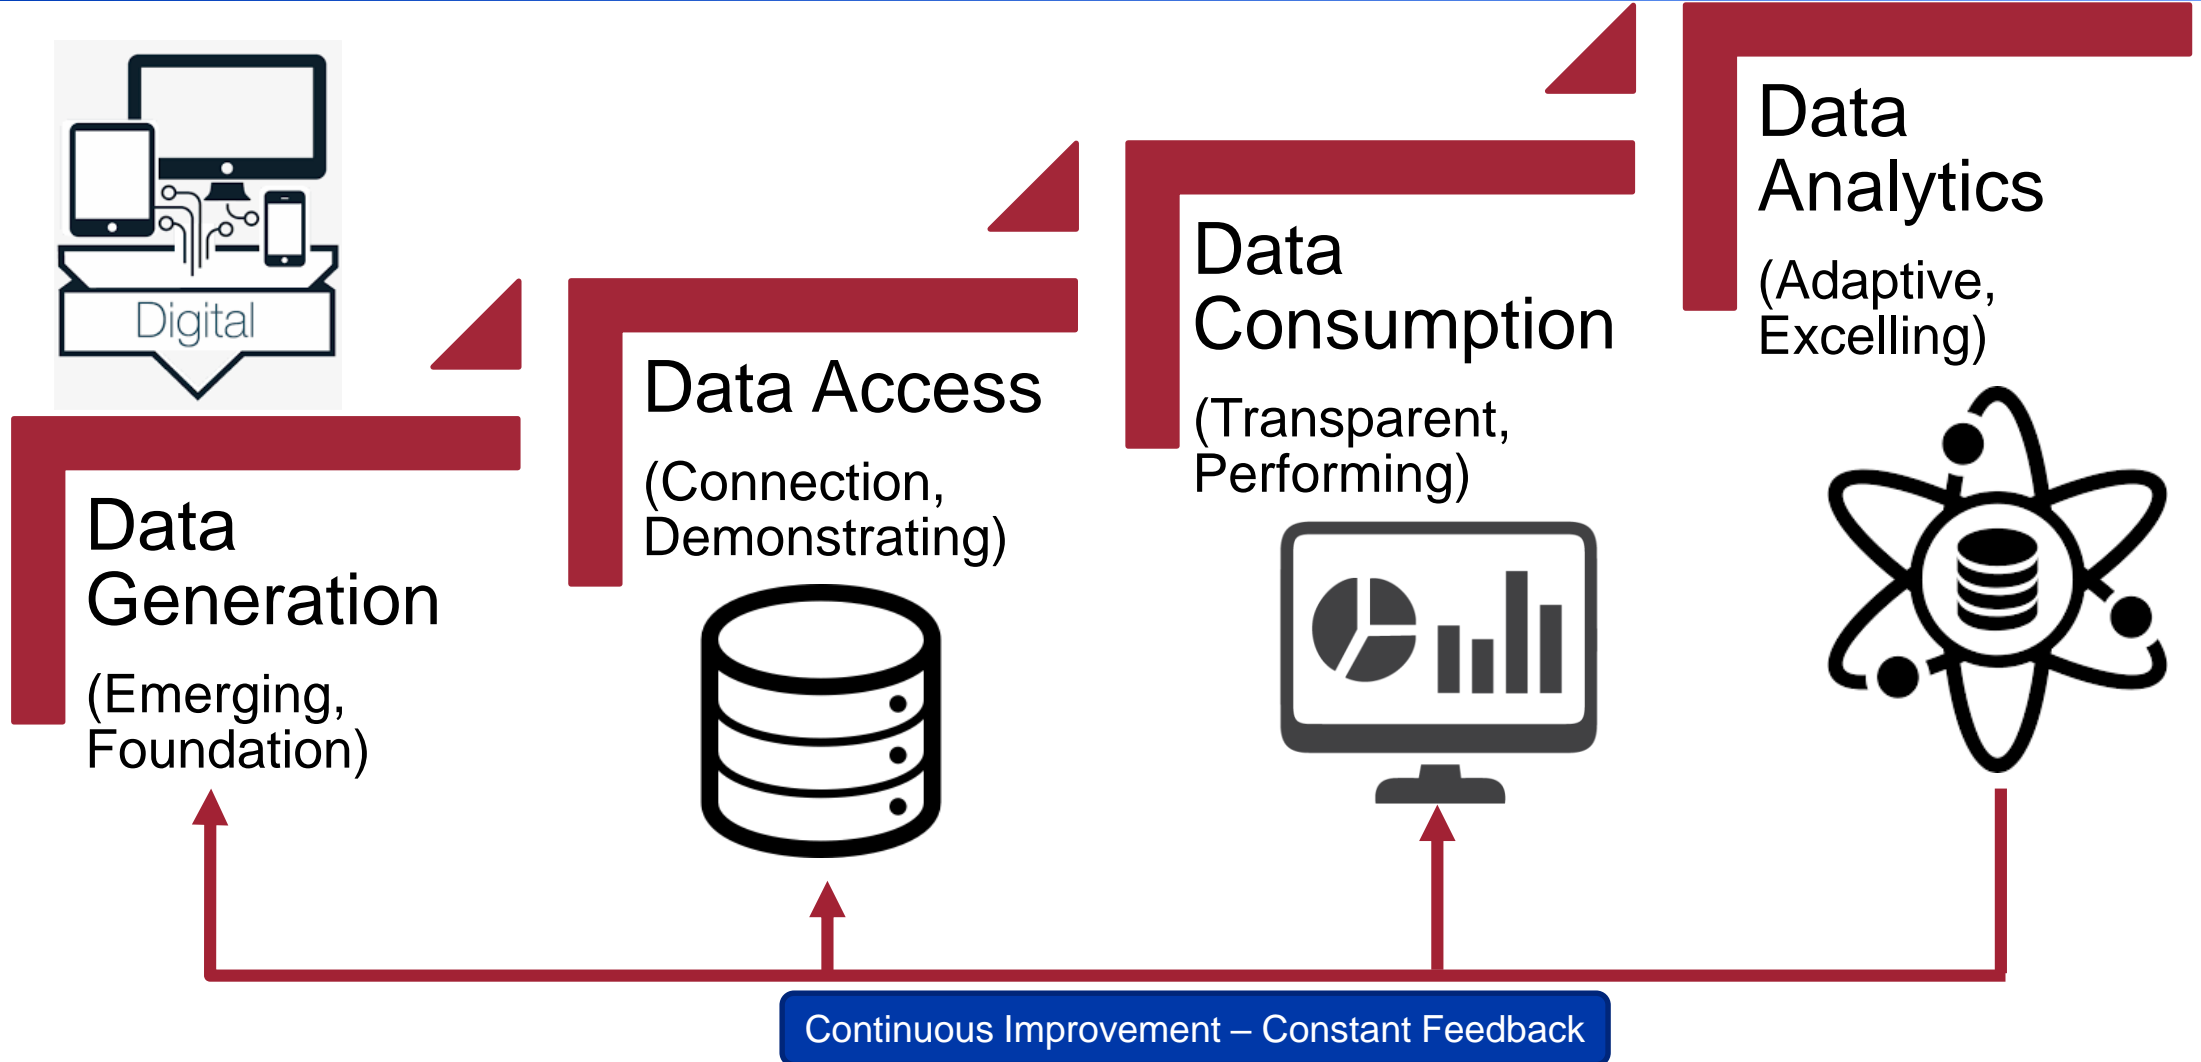

- Data is at the heart of digital transformation, but the **connections** are what provide the big picture
- Connections do not have to be made at the beginning of product lifecycle or continuous to be a leveraged

Data Migration can and should support both the preservation and the creation of these connections

# Digital Maturity

Global Product Data Interoperability Summit | 2022

# Why are we doing Digital Transformation

Global Product Data Interoperability Summit | 2022

Generate, Access and  
Consume Data

Silos to ASoT Integrated Flow

Desktop/Shop-floor to Database

Paper to Digital

Digital  
Transformation

# Migration Badges of Honor

Global Product Data Interoperability Summit | 2022

- **Big Bang Migration**

- 3 years
- 3500+ users
- Replaced over 120 legacy systems with new PLM, ERP and MES systems and processes

- **SolidWorks Migration**

- 9 months
- 50+ users
- 63K objects
- Replaced legacy SmarTeam system and established the framework for additional document management

- **Access Database Migration**

- 1 year
- 2000+ users
- 35K objects
- Replaced legacy SharePoint system to converge change & document management data with CAD data

- **Teamcenter Enterprise migration**

- 4 years
- 4700+ users
- 5M objects and 11M relationships
- Converging all document management data into existing Teamcenter Unified instance

# Migrations are a slog...

Global Product Data Interoperability Summit | 2022

So why spend time, energy and resources on migrations?

# Drivers for Making the Move

Global Product Data Interoperability Summit | 2022

- **Software/Infrastructure Obsolescence**
- **Mergers & Acquisitions**
- **Data Consolidation**
- **Legacy Data Digitization/Access**
- **Improved Software Capabilities**
- **Management Mandate**
- **Other**

**Every Migration is an opportunity for Digital Transformation!**

# Migration Balancing Act

Global Product Data Interoperability Summit | 2022

Data migration is often needed in support of digital transformation to help meet business and contractual requirements

**But, migrations involve more than just moving data**

- Successful migration engagements include the following prerequisites/concurrent implementations:
- Process discussions and how the migrated data will support the go forward processes
- Process development and supporting data model updates in the system
- Process and tool interface training for validators and eventually for the users

# Initial Data Migration Tasks

Global Product Data Interoperability Summit | 2022

- **Migration requirements defined**
  - Data conversions/translations defined
- **Prerequisites defined**
- **Profiling identified**
  - Internal data collisions
  - Data Collisions with data already in the destination system
  - Data that is invalid for the destination system
  - Potentially review to exclude stale/unused data
- **Profiling resolutions implemented**
  - Source data clean up
  - Collision renaming
    - Source system vs part of translation to destination
- **Data sequencing requirements identified**
- **Validation/Testing plan developed**
- **Reporting metrics defined**

# Initial Process Migration Tasks

Global Product Data Interoperability Summit | 2022

- **Develop Communication Plan**
  - Account for differing levels of communication
    - Account for external change communication needs
  - Use several methods for communication: email, posters, etc.
- **Identify Subject Matter Experts (SMEs)**
- **Identify Change Agents**
- **Workflow/Process Definition & Development**
  - Look for opportunities
    - Process Improvements
    - Reduce data re-entry
- **Training Plan**
  - Development
  - Delivery timing

# Conclusion

Global Product Data Interoperability Summit | 2022

Data migration is a chance

- To cleanse data

- To connect data

- To re-evaluate and improve processes

- To support the future while not re-creating the past

Process migration is an opening

- To take advantage of new technology

- To develop more efficient methods

- To create integrations

Put a heavy focus on organizational change management to help people see the beauty in both  
**Migration & Transformation**

# Questions

Global Product Data Interoperability Summit | 2022

# Potential Backup Slides

Global Product Data Interoperability Summit | 2022

# Path to Accomplish Goal

Global Product Data Interoperability Summit | 2022

- Establish RACI chart for all migration tasks
- Determine quantity of data
  - Determine file storage requirements
  - Determine historical data access requirements
    - Move all data to destination vs migration archiving strategy
- Define data security requirements
- Determine migration method (In house vs Vendor)
  - In house – Identify Method
  - Vendor – Identify Vendor
- Determine Timing
  - When data is needed in production
  - Big Bang, Delta, Process Specific
- Develop migration validation methods and reporting
- Establish sun setting timeframe for source system
