

A Teaming Approach to Scaled Adoption

Stephanie Dinkins
Joan Dodson, Ph.D.

GLOBAL PRODUCT DATA INTEROPERABILITY SUMMIT 2023

Presenters Bio

Global Product Data Interoperability Summit | 2023

Stephanie Dinkins, Northrop Grumman Corporation

- Technical Fellow, Senior Systems Engineering Manager, and Digital Transformation leader for the DT Office
- Senior Systems Engineering Manager with 20+ years experience in people leadership, project management, and engineering
- 7+ years leading R&D projects and managing innovation portfolios
- Sector Invention of the Year Award 2019
- Connector leadership style envisions cross-domain innovations and brings together the right talent to make it happen
- 10 years with Search & Rescue in Colorado

Joan Dodson, Ph.D., Northrop Grumman Corporation

- Technical Fellow, Engineer of the Year 2021+
- Senior Principal Human Factors Engineer on the Northrop Grumman User Experience (UX) Team
- 10 years experience researching and evaluating interfaces for mission-critical applications.
- Prior to Northrop Grumman, University of Alabama as a Professor cross-listed in Psychology and Engineering
- Currently Adjunct Professor at University of Alabama lecturing undergraduate and graduate classes in Human Factor Engineering
- Her research interests include bridging the gap between cognitive science research and interface design in Situation Awareness, Cognitive Overload and Fatigue, and Trust and Autonomy issues.

- Our Goal is to understand key factors for adoption at scale
- Our talk will:
 - Identify innovative mindset beliefs and practices
 - Identify common pitfalls that derail adoption
 - Identify successful adoption across organizations

Agenda

Global Product Data Interoperability Summit | 2023

- Turning the ‘Valley of Death’ to green
- A teaming approach
- The cairn navigation framework
- Human factors and change management theory
- Scenarios and actionable insights
- Path forward

What is a Cairn?

Global Product Data Interoperability Summit | 2023

Cairn in The Valley of Fire, Utah

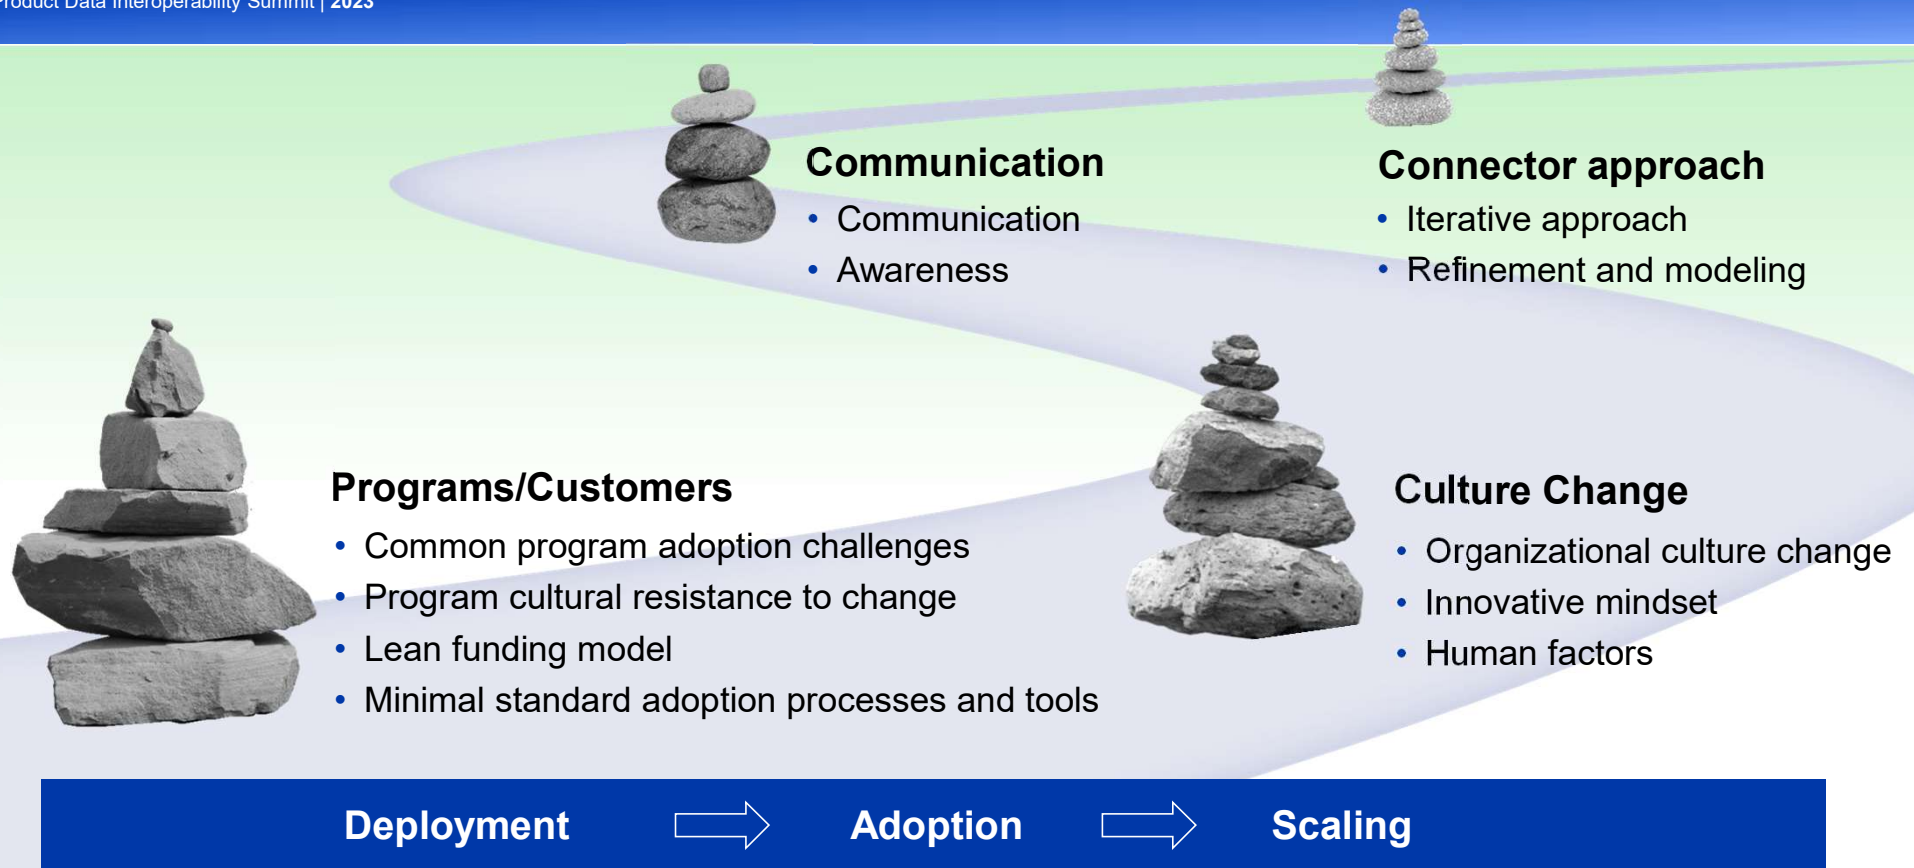

Cairns in Volcanoes National Park, Hawai'i

A Cairn is a pile of stones that serve as a trail marker to help keep hikers on the right trail.

Turning the Technology's 'Valley of Death' to Green

Global Product Data Interoperability Summit | 2023

Benefits of Cairn Connector Framework

Global Product Data Interoperability Summit | 2023

- Cairn framework incorporates key **guideposts** to help teams **navigate** the valley successfully
- **Reduces** time to adoption and scaling
- Enables **collaboration** for a successful **transformation**
- Address resistance, increase engagement at all levels
- Considers workflows, **culture, change** management

The Cairn Connector Strategy

Global Product Data Interoperability Summit | 2023

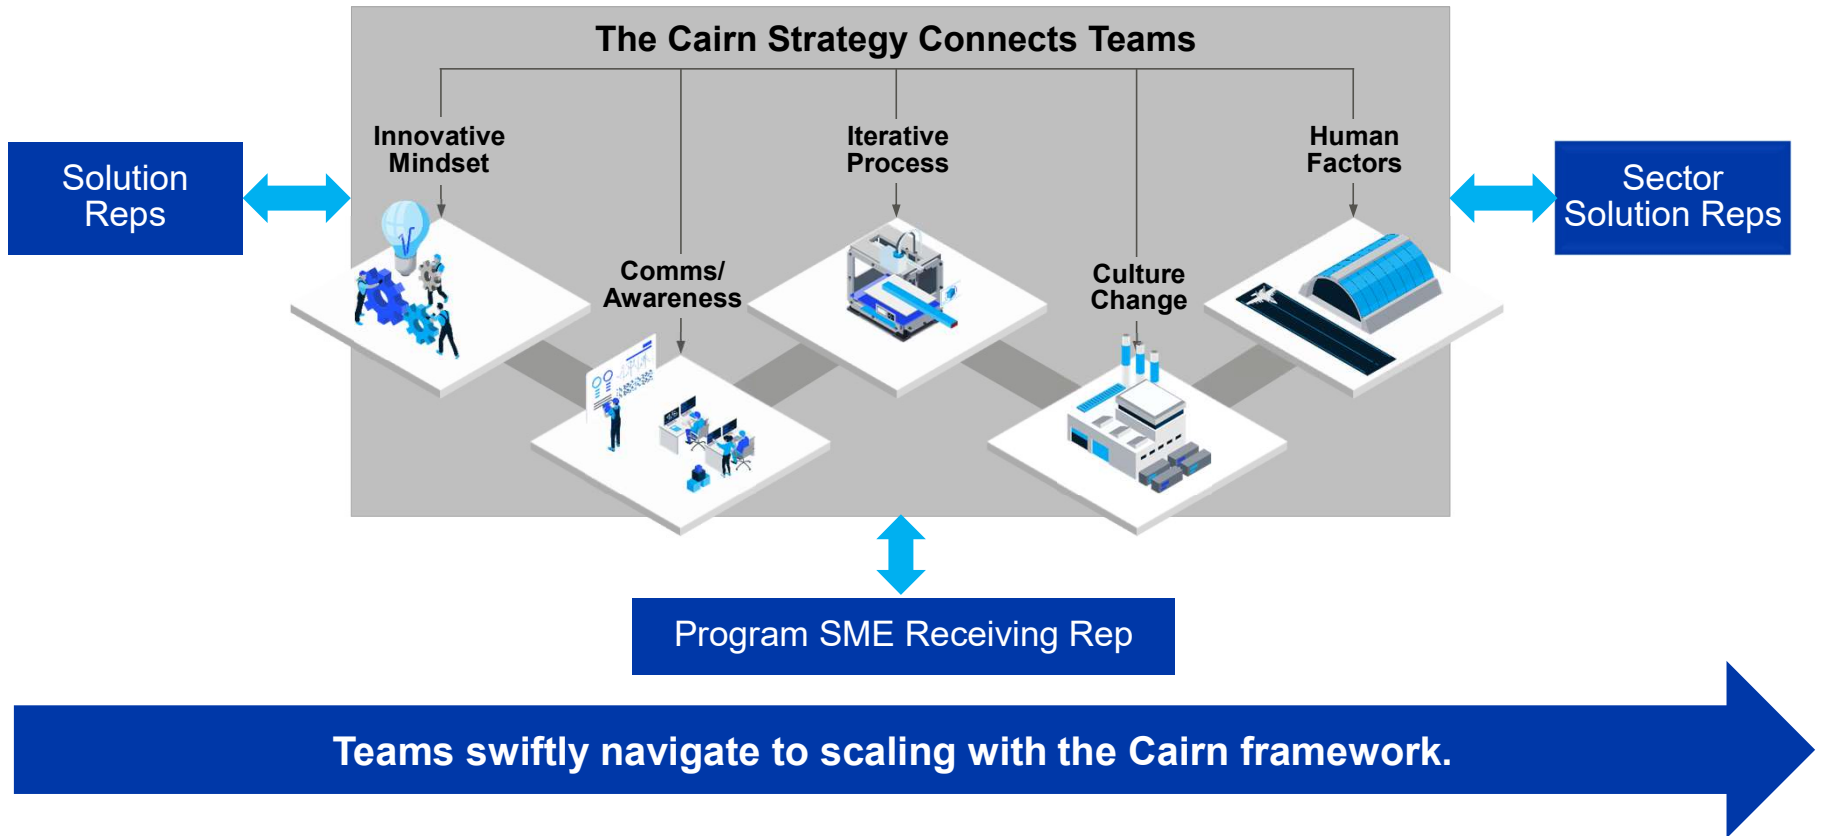

- The Cairn **prioritizes people and program** connectivity
- Measurable adoption **guideposts**
- **Innovative mindsets** increases adoption
- **Team-centric** focus builds **trust & safety to change**
- Cairn **teams** are **elastic**
- **Early** and active user engagement

People Connect and Technology Enables.

The Cairn Framework

Global Product Data Interoperability Summit | 2023

Innovative Mindset

Global Product Data Interoperability Summit | 2023

- Team trust and integrity
- Failure isn't scary
- Remove territoriality
- Load balance
- Make time to brainstorm
- Measure and communicate successes, failures, and lessons learned
- Recognize and Reward innovation

* Prior Work:

- The Innovative Mindset: Eight Essential Steps to Transform any industry, Lorraine Marchand
- The Innovation Mindset, Jennifer Kenny
- The Innovator's Dilemma, Clayton Christensen
- Ted Talks – Bruce McCabe, Sir Ken Robinson, and others

Comms & Awareness: Change Management

Global Product Data Interoperability Summit | 2023

- Motivate and engage users
- Address human behavioral factors
- Encourage adoption of new tools
- Build trust, provide support systems

Iterative Engineering & Maturity

Global Product Data Interoperability Summit | 2023

- Iterative engineering
- Iterative development
- Fail fast incorporate feedback
- Flexible collaborative process
- Must have the right team!
- Leadership adoption of agile development lifecycle
- Strategically align funding to mature MVPs to product

Change Methodology

Global Product Data Interoperability Summit | 2023

- Psychology of change
 - 1/3 people are okay with change
- Address human behavioral factors
 - Human brain is wired to resist most change
- Motivate and engage users to implement, transition and minimize disruption
 - What is in it for me?
- Train employees
 - Best training methodology

Human Factors

Global Product Data Interoperability Summit | 2023

- Methodology integrates complementary approaches:
 - Change management theory
 - Understand reactions to change
 - Mitigate resistance, increase adoption

The Cairn Framework

Global Product Data Interoperability Summit | 2023

Real Examples and Insights

Global Product Data Interoperability Summit | 2023

Scenario #1:

Transitioned our organization's agile workflow tools to a more digitally connected workflow tool suite

- Addressed **culture change** early to get buy-in
- Innovative **mindset** and high trust
- Rolled out changes in small **increments**
- Provided multiple forms of **training and learning** opportunities
- Led to **scaled** usage in other organizations

Scenario #2:

Deployed an early pilot of a data analytics tool to a small program

- **Resistance to change** was high and we failed to achieve buy-in by incorporating receiver's input early
- Failed to address their fear of change **soon enough**
- We were **successful in performing iterative deployments**, but had **limited resources** for connecting with team throughout the transition
- Offered 1-hour virtual training session, but users **required additional help**

Recognizing some key factors in successfully implementing a digital transformation across organizations.

Path Forward

Global Product Data Interoperability Summit | 2023

- Monitor and refine our methodology, metrics, continuing work
- Refining approaches with teams for program success
- Continuing work with project teams
- Ensuring sustained program adoption over time

Thank you

Law of Diffusion of Innovations

The Pillars

Global Product Data Interoperability Summit | 2023

- Creates easier faster adoption
- For both traditional siloed and model-based strategies organizations
