Global Product Data Interoperability Summit | 2023

Nate Nalven

Vice President - Customer Engagements

"The eQube® suite of products provide solutions that are only limited by our imagination"

Nate is a highly motivated and dedicated leader at eQ Technologic with over 35 years of Aircraft, Navel, Automotive & Weapon system hardware design, Manufacturing, and Management as well as Architecting and leading the Software & System development, implementation and computing infrastructure experience at Northrop Grumman.

His background uniquely positions him as in a consulting role on high level business, process and technical strategies, and down and in on the design through deployment leading the execution, deployment and support teams.

About eQ Technologic ('eQ')

Global Product Data Interoperability Summit | 2023

Innovative Enterprise Software Company

- Focused on delivering Business Outcomes
- Makers of the revolutionary eQube®-DaaS platform for weaving Data Fabric
- In business since Yr. 2000
- Company founded in the US with subsidiaries in
 - India, UK, & Germany

Customers in 26 Countries

North America
Europe
United Kingdom
Asia-Pac

Worldwide Industries

- Aerospace & Defence
- Federal (DoD)
- Automotive & Machinery
- Ship Building
- High-tech
- Medical Devices
- Energy
- Transportation
- Food
- CPG & Retail

CDM Approach – business entities – neural model

Global Product Data Interoperability Summit | 2023

Digital Thread

Global Product Data Interoperability Summit | 2023

Digital Thread Leveraging CDM based API factory

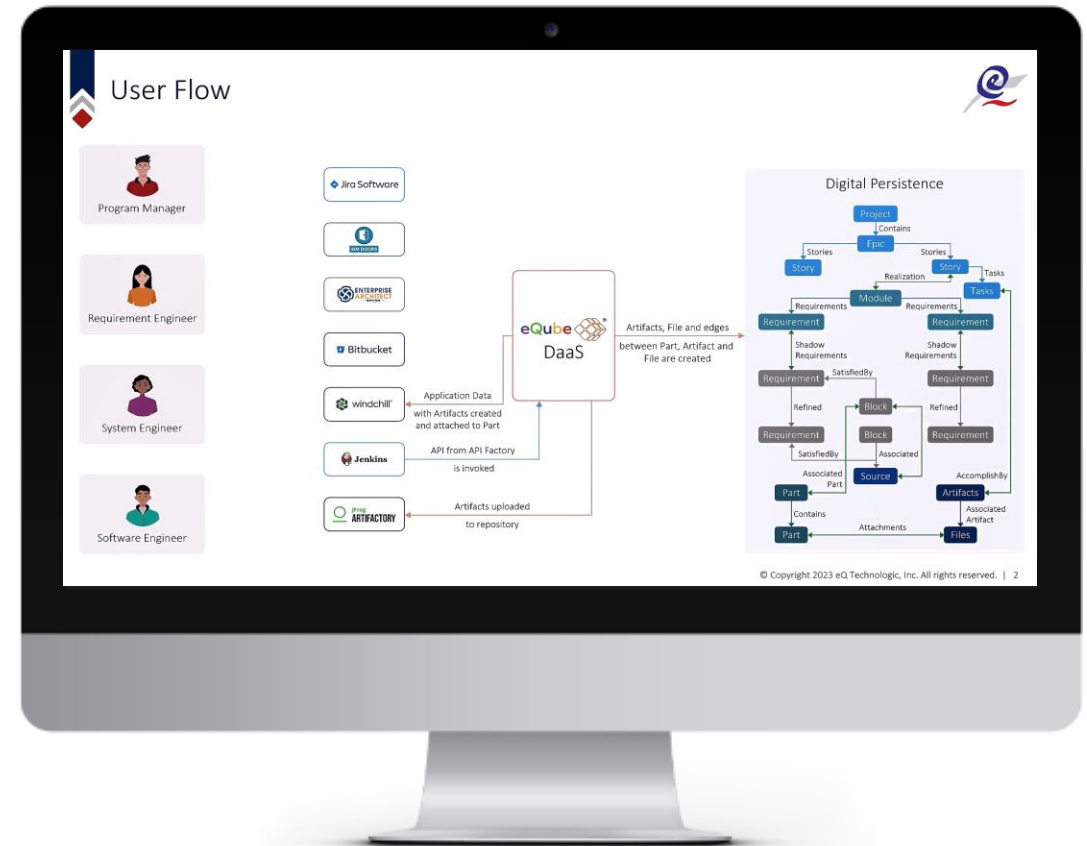

Global Product Data Interoperability Summit | 2023

Actors

- JIRA (Program Management)
- DOORS NG (Requirements Management)
- Enterprise Architect (System Modelling)
- Bitbucket (Software Configuration Management)
- Jfrog Artifactory (Software Repository)
- Windchill (PLM)
- Jenkins (CI/CD Pipeline)

Orchestration

- Common Data Model (CDM)
- Data Catalogue
- API Factory
- Automated Edge Database
- Automated Digital Fabric
- Navigable Links
- Eliminate User Clerical Activities

eQube®-DaaS Differentiators

Global Product Data Interoperability Summit | 2023

- Data Fabric: establishes a robust, scalable, secure, & flexible data fabric
- Low/No-code Integration platform: unique capability for rapid solutions implementation
- Heterogenous systems: agnostic to any application or data source – neutral platform
 - 80+ OOTB connectors released in the market (ALM, PLM, ERP, MES, MRO, CRM, databases – relational & No-SQL, streaming, files, data warehouse /lake,...)
 - Platform is upgrade tolerant
- Integrated data virtualization layer : effectively deals with any data, any format, any API, at any speed...
 - Provides OOTB capabilities of data mash-ups, data federation, replication, smart caching, migration
- Security: connected application level, authentication methods (NTLM, SAML, Kerberos, Certificate based..), secure collaboration
- Deployment flexibility: VMs, Containers – on-prem, multi-cloud, hybrid
