prostep IVIP

PROSTEP IVIP AT A GLANCE

30
years of
excellence

A strong community since 1993

Leading Worldwide-acting Neutral & Non-Profit Network

180 Members from Manufacturing Industry, IT and Research

Driven & Funded by its Members

Know-how exchange in non-competitive areas

Sharing risks and funds, instead of doing it alone

Best practices, even beyond branches and continents

Digital Transformer in Product Creation & Production

Defining Standards & Interfaces for Digital Processes

Safeguarding industrial Benefits & Interoperability

Expert in IT-Standards & Industrial Implementation

PROSTEP IVIP AT A GLANCE

1 OPENNESS

Openness and integration capability are indispensable for digital continuity in heterogeneous system landscapes.

The prostep ivip association is a promoter of open PLM systems and the efficient use of engineering IT standards in systems engineering.

FACTS

3 Project groups

22 members involved

International collaboration across **4** countries

2 INTERNATIONAL STANDARDIZATION

The prostep ivip association works on aligning the collaboration requirements from industry.

In doing so, we lay the foundations for international standards and make companies more independent of their IT-systems and system suppliers.

FACTS

5 Project groups

20 members involved

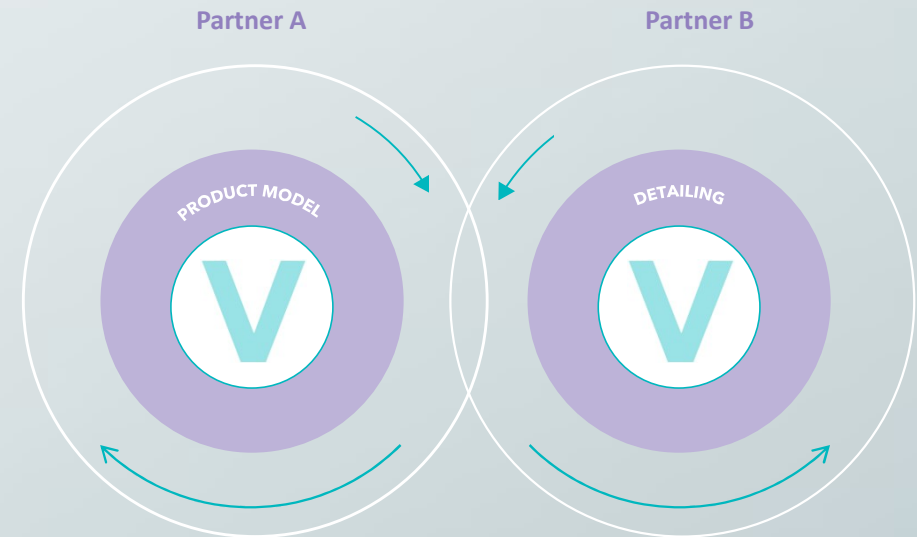

International collaboration across **7** countries

3 DATA DRIVEN ENGINEERING COLLABORATION

Improving cross-domain and cross-company collaboration is the mission of the prostep ivip association.

We bundle user requirements, develop standards and make recommendations for collaboration in product development and production.

FACTS

17 Project groups

70 members involved

International collaboration across **7** countries

4 PRODUCTION COLLABORATION

Cross-company cooperation is often hindered by heterogeneous IT systems in production. That is why the prostep ivip association also supports its member companies in integrating their digital manufacturing processes.

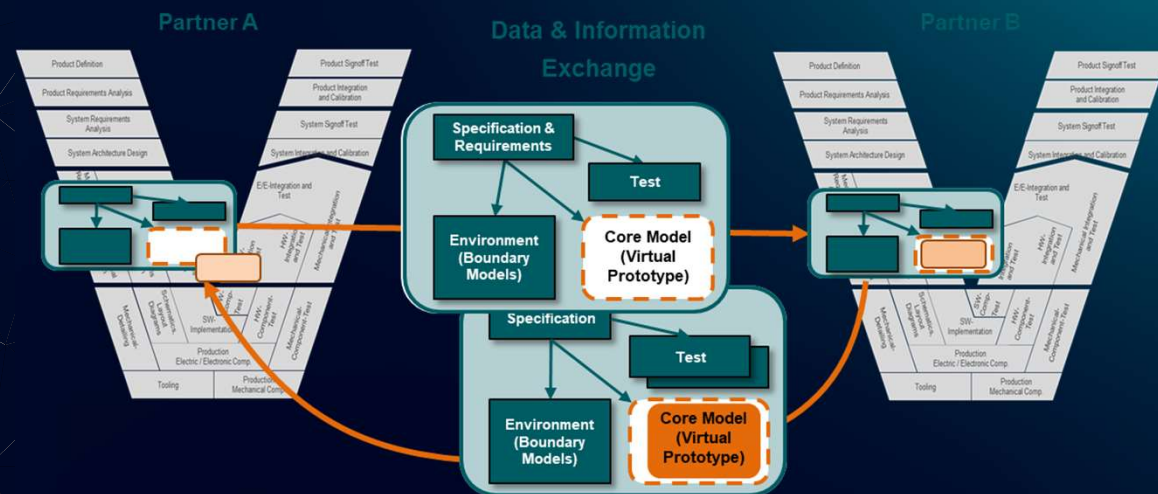

FACTS

2 Project groups

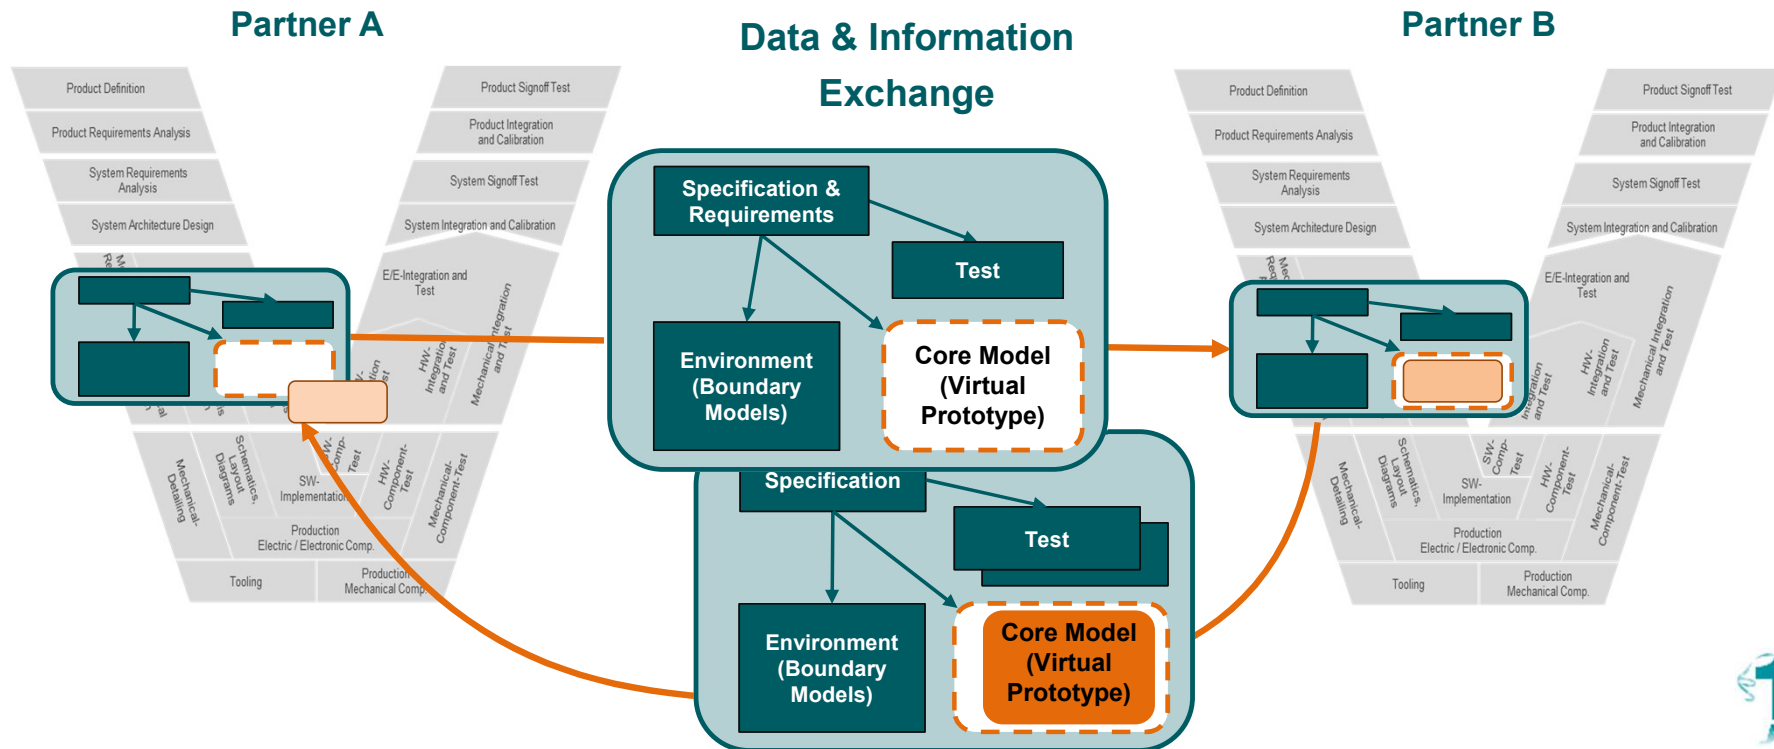

10 members involved

International collaboration across **2** countries

Smart Systems Engineering – Smart SE

Motivation Smart Systems Engineering (SmartSE) Collaborative Simulation-based Engineering

In Scope: Exchange of all artefacts required for an efficient, cross-company simulation-based engineering like specifications, requirements, test cases, simulation models and model meta data.

Smart Systems Engineering (SmartSE) 10 years SmartSE – what have we reached?

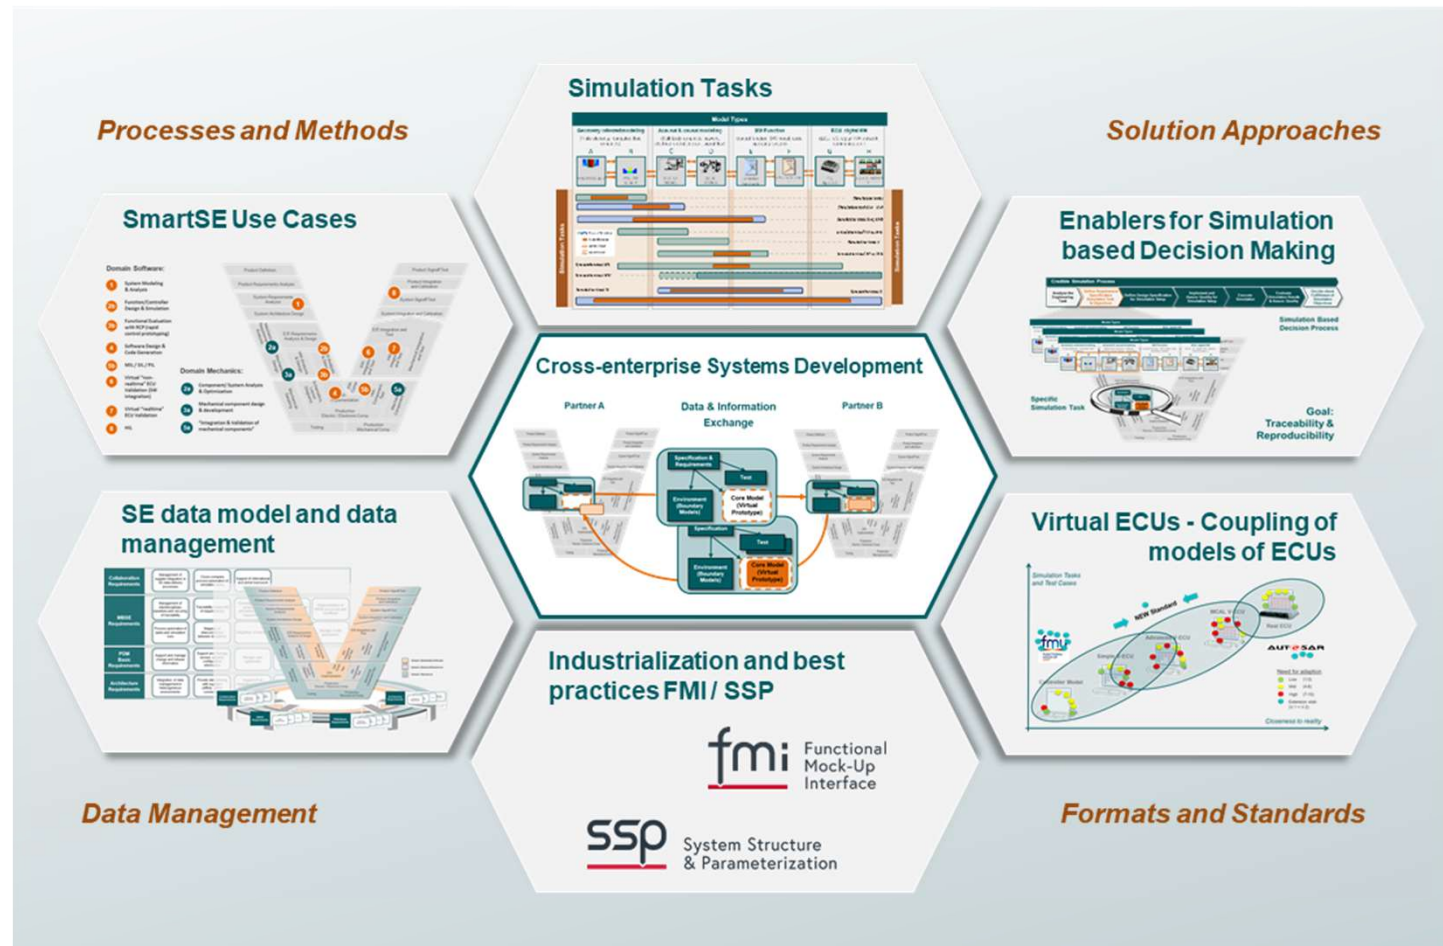

Smart Systems Engineering (SmartSE)

Selected SmartSE Projects Results - Solution Cluster

Enabling collaborative simulation-based engineering

Smart solutions and enablers for the exchange of all artefacts required for an efficient, cross-company simulation-based engineering like specifications, requirements, test cases, simulation models and model meta data.

Package

Spinning the digital thread across enterprises

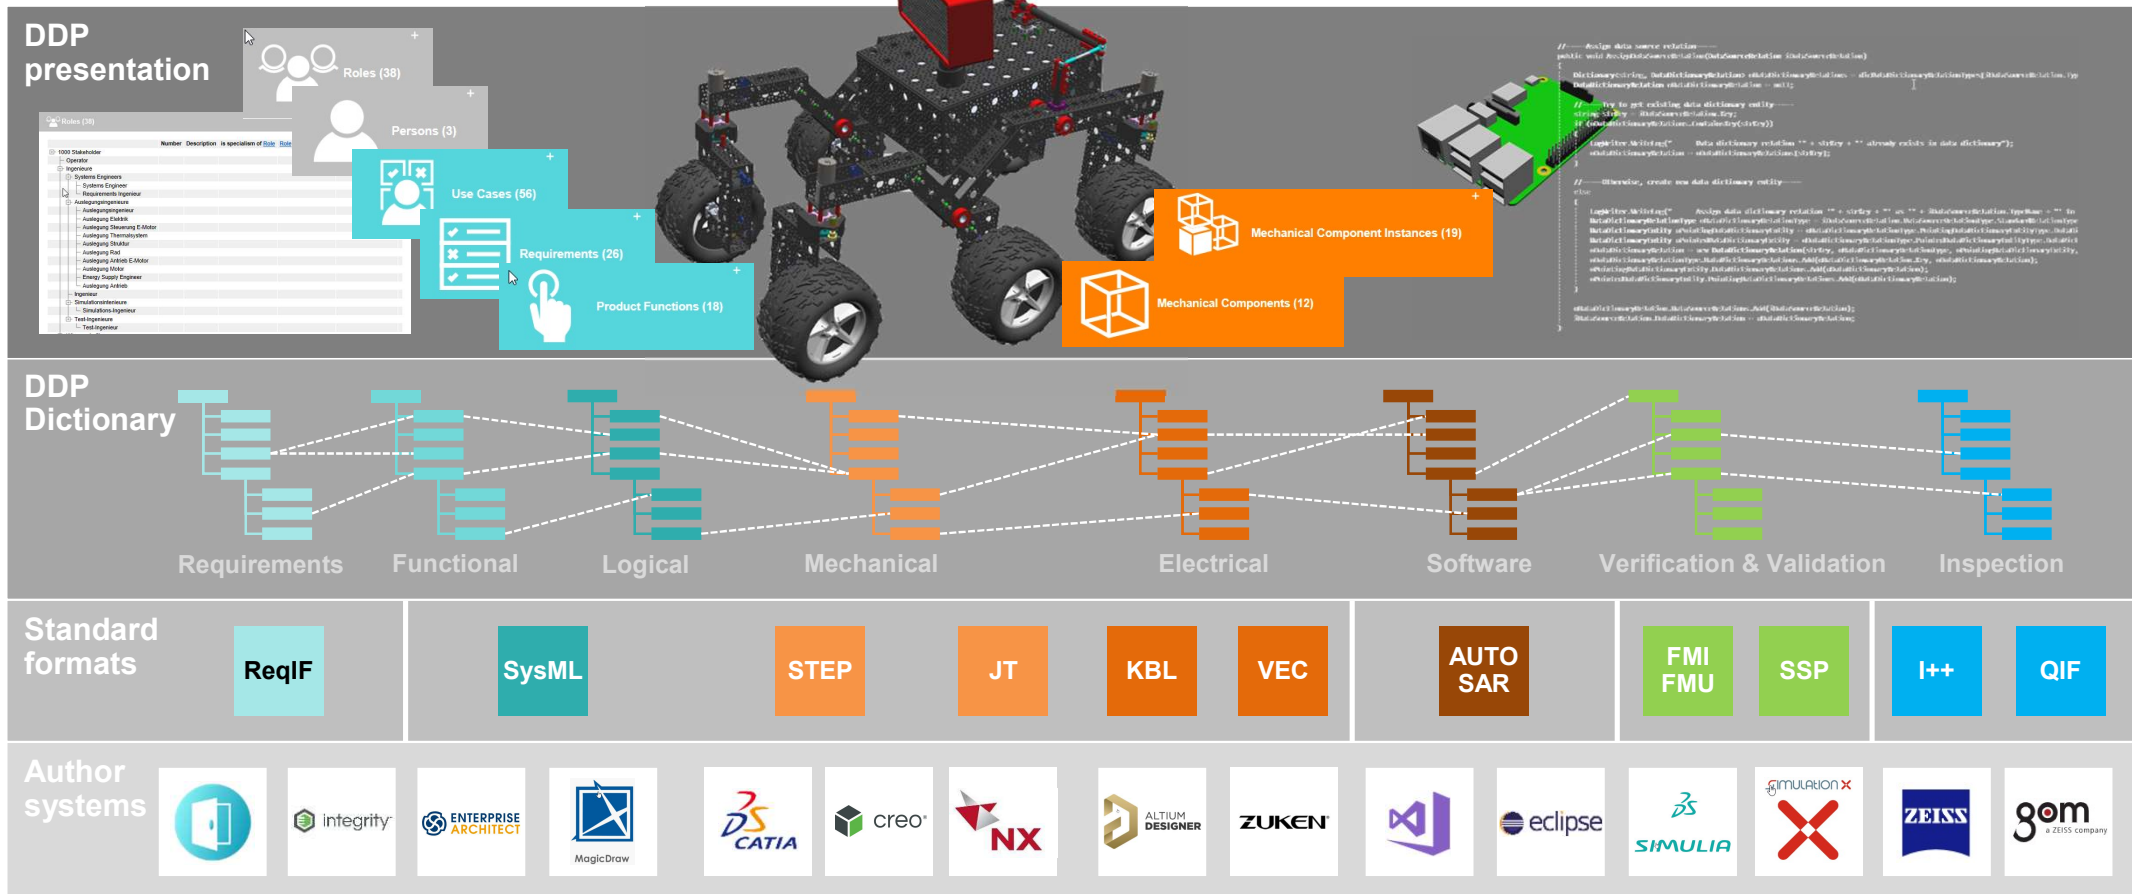

DDP enables cross-domain collaboration in MBSE

Today various standards for exchanging domain-specific data in systems engineering exist. However, the items contained therein can't be linked and thus a cross-domain collaboration and data exchange is poorly supported

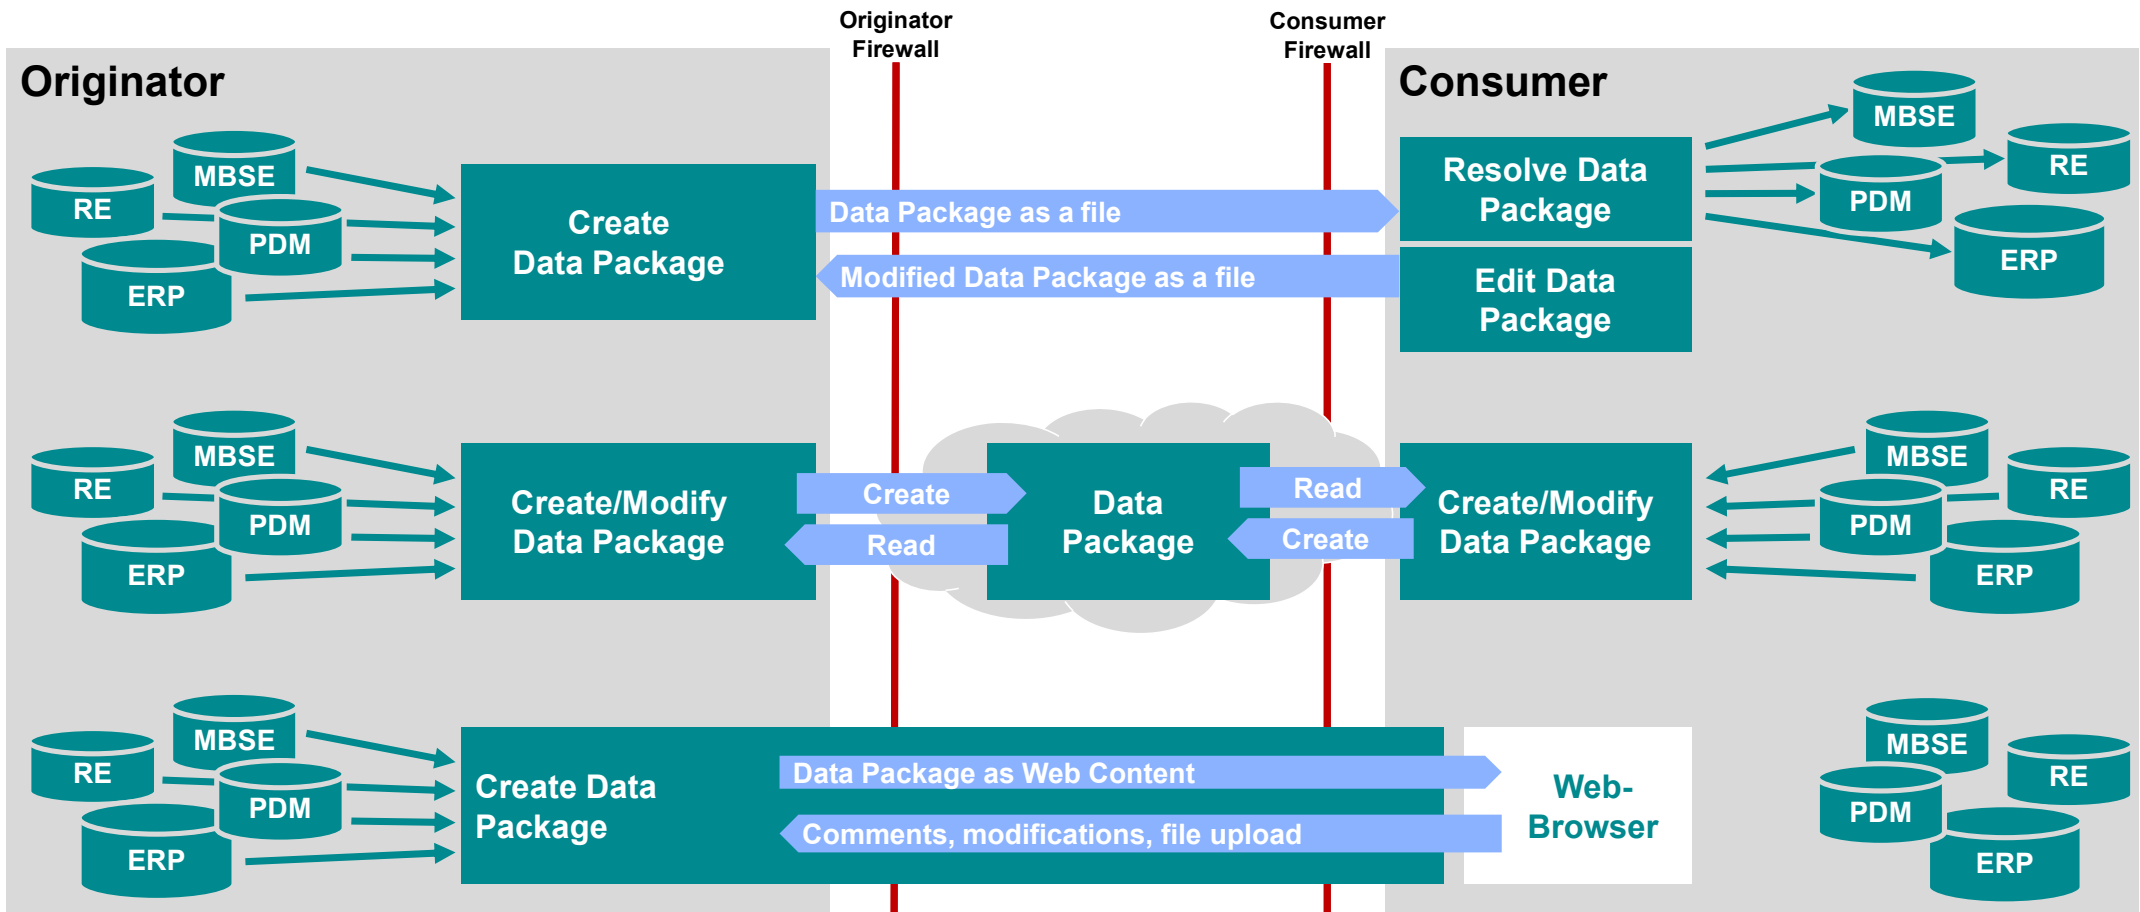

This project address the lack of a data exchange standard which allows for a cross-company and cross-domain exchange of linked systems engineering data under consideration of an end-to-end configuration management.

Architecture of the Digital Data Package

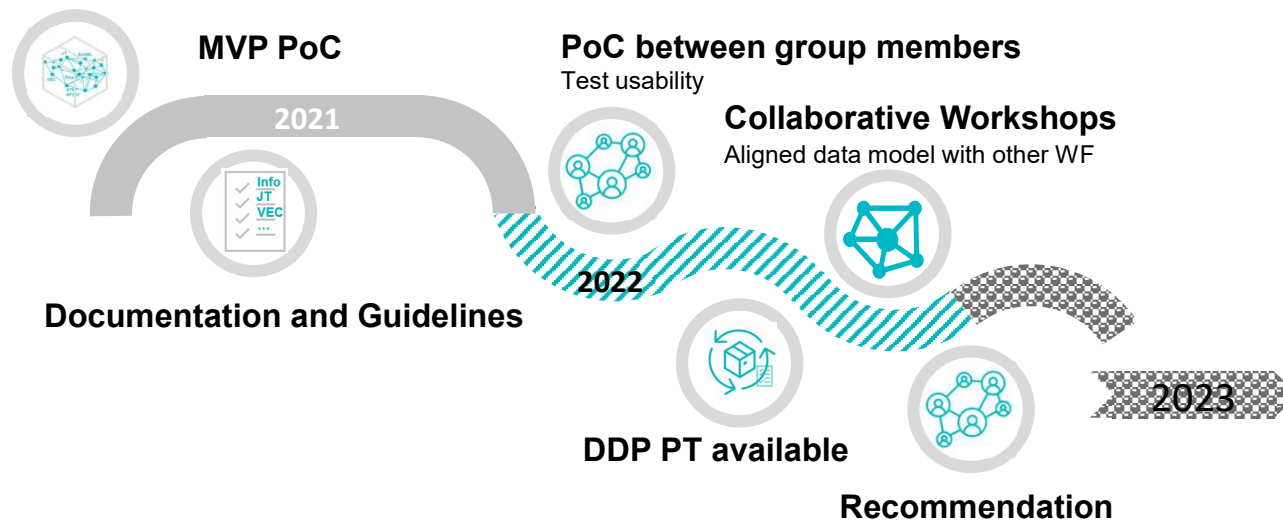

How Organization collaborate using a Digital Data Package

DDP Goals 2023

- Enhance Formats and Mappings
- SysML V2 investigation impact on DDP
- Extend DDP dictionary to consider SmartSE, MoSSEC, AAS
- Initiate standardization of DDP data model (OMG, DIN)
- Enhance model and demonstrators with V&V
- Enhance demonstrators with MCAD & ECAD
- Develop / publish Best Practices

Collaborative Digital Twins

Foundation of future collaboration

Project Start: Collaborative Digital Twins

Foundation of future collaboration

Architectures &
Ecosystems

FACILITAION AND IMPROVEMENT OF COLLABORATIVE DEVELOMMENT ACROSS COMPANIES
EMPOWER MEMBERS TO ESTABLISH & USE COLLABORATIVE DIGITAL TWINS & EASE DATA-DRIVEN
STRATEGIC DECISION MAKING

Collaborative Digital (Engineering) Twins

established weeks

asynchronous data exchange

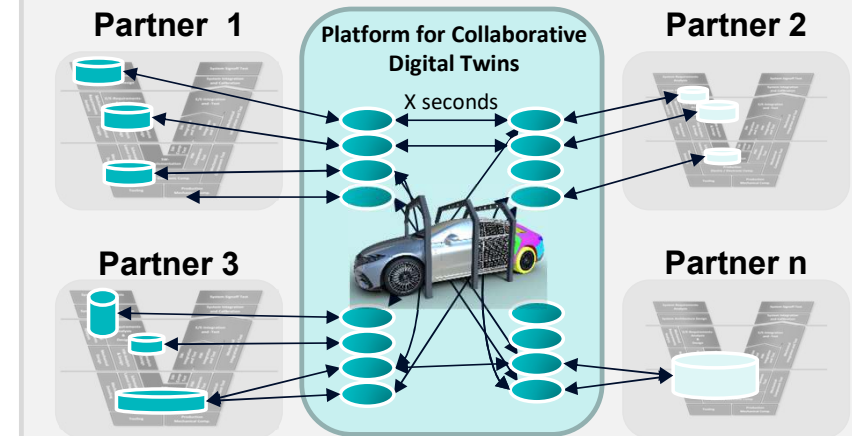

Steps for Data Exchange (loops ignored)

- Extract Data for export
- Convert Data
- Validate extracted Data
- Transfer Data
- Receive Data
- Check Data
- Import Data
- Connect/ Integrate Data
- Archive replaced Data
- Release new Content

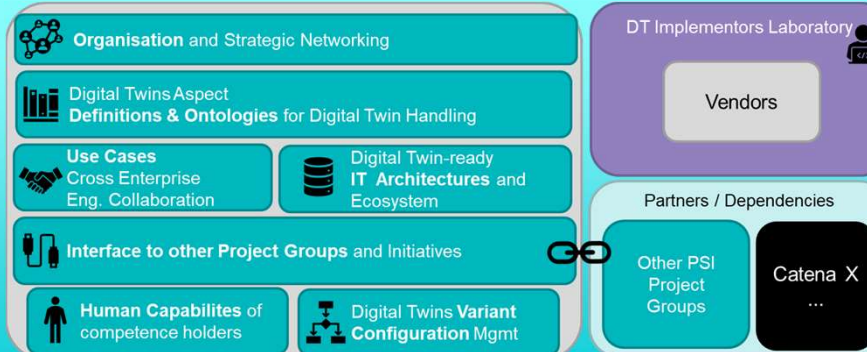

challenging seconds

synchronous linked collaboration

CDT

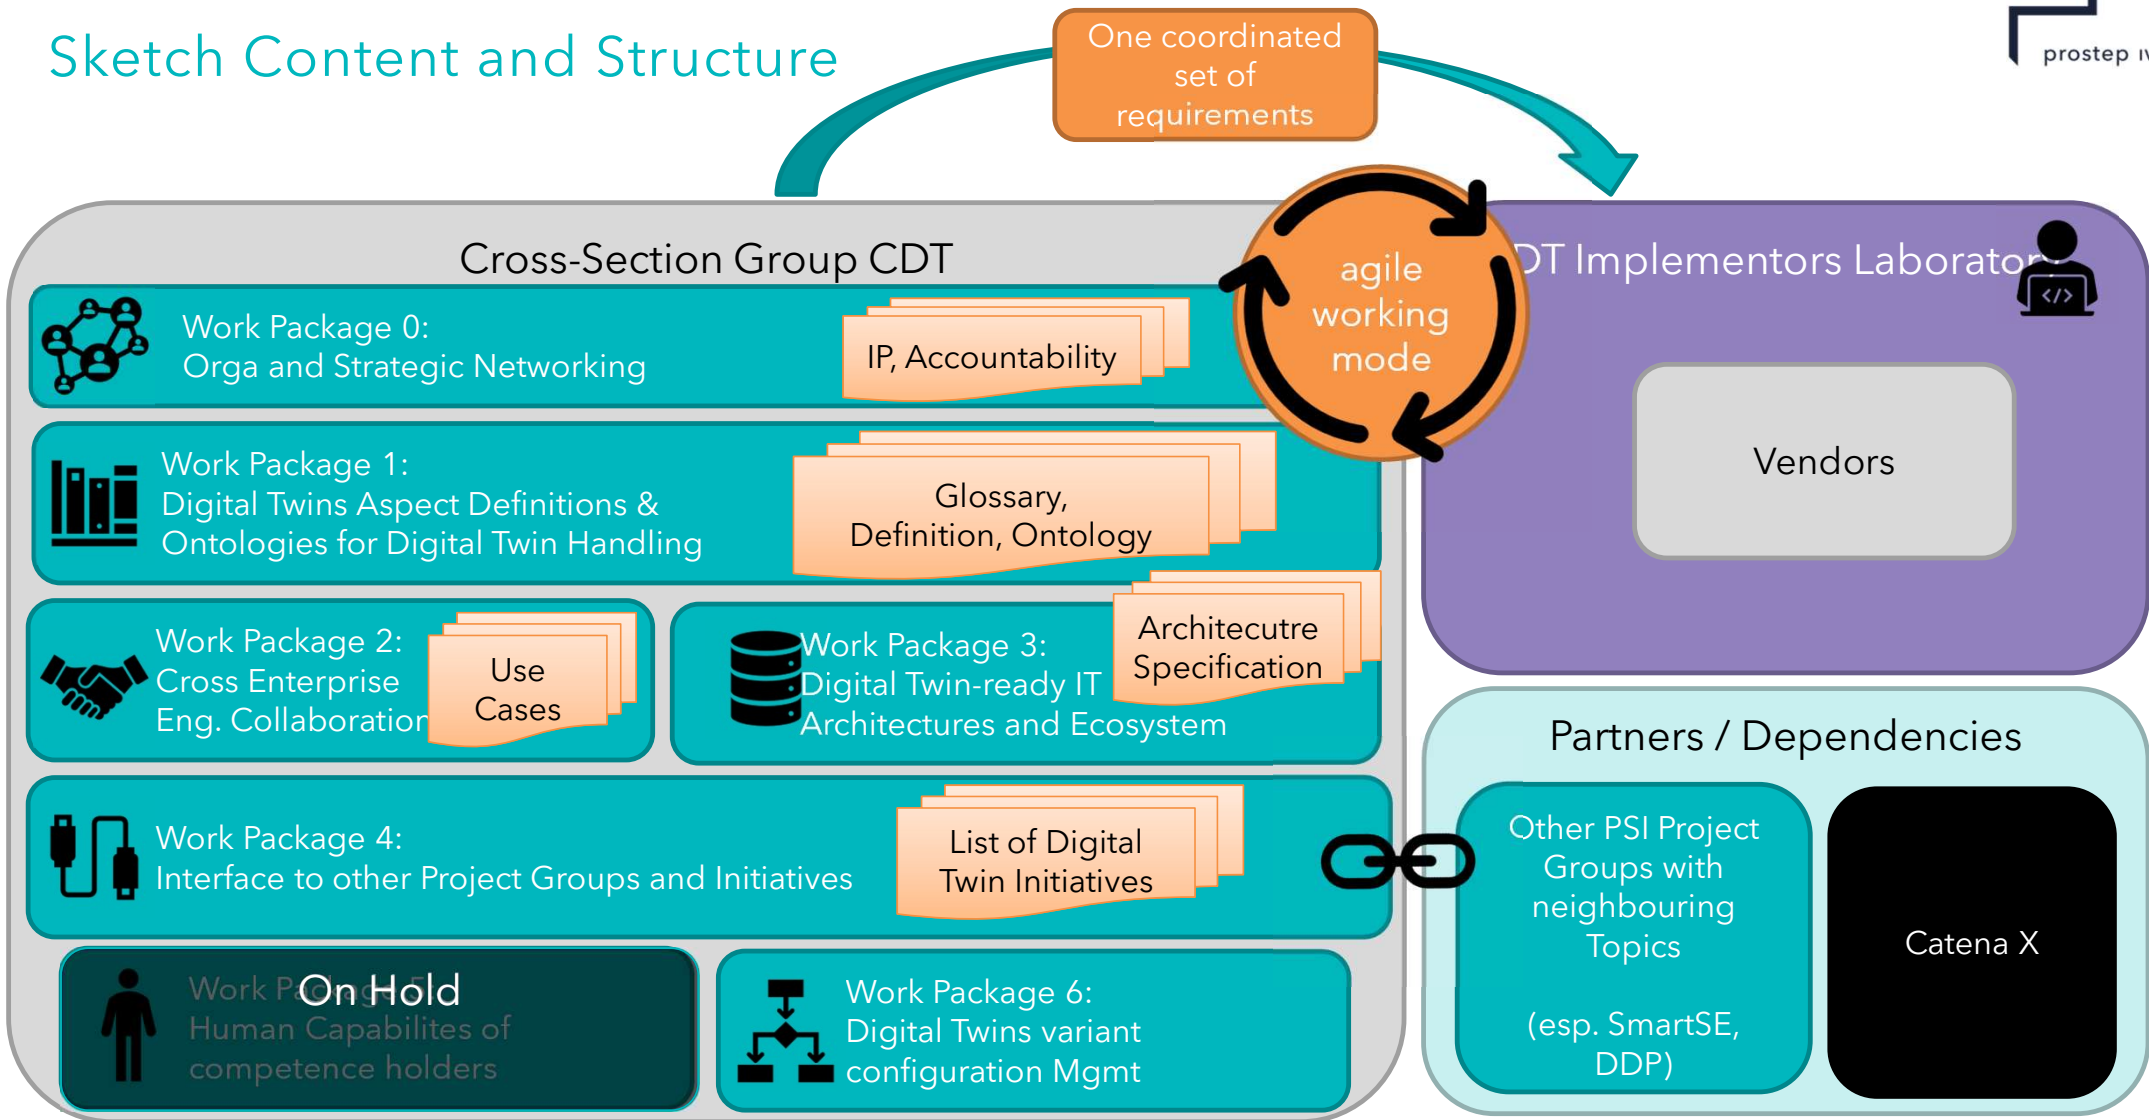

release \longleftrightarrow receive

Challenges:

- IP
- Accountability
- Know How Protection
- Ontology / Semantic
- Architecture (cloud based)
- Maturity of Models / Data
- Product Line Engineering

Sketch Content and Structure

Current Member List

Lead: Mercedes, Schaeffler

Over 100 interested partners

Industrial Appliers / Users

- Airbus
- AVL
- Boeing
- Bosch
- Hella
- Hewlett Packard
- Hyundai
